

JESSICA JOHN OSTA

Student at Christ University Bangalore, Kengeri Campus

Bengaluru, India 560100 | +91 9674172230 | jessicaostawork@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Computer Science Engineering student and aspiring AI/ML Engineer focused on building data-driven, intelligent systems. Combines strong software development and data structures foundations with hands-on project experience in machine learning frameworks, data pipelines, and NLP. Proven ability to build and deploy practical applications, including natural language processing models, computer vision frameworks, and Retrieval-Augmented Generation (RAG) systems. Skilled in data preprocessing, model deployment, and deep learning workflows. Seeking an entry-level role to contribute to an innovative AI development team.

SKILLS

Languages: Python, Java, C, HTML, CSS, JavaScript

AI / ML: Machine Learning, Model Training & Evaluation

Tools & Platforms: Git, GitHub, Visual Studio Code, Google Collab

EDUCATION

Christ (Deemed to be University), Bangalore – Kengeri Campus

Expected May 2028

Bachelor of Technology, Computer Science

St. Agnes' Convent School, Howrah, India

April 2024

Senior Secondary (Class XII), Science — ISC: 93.25%

St. Agnes' Convent School, Howrah, India

April 2022

Secondary (Class X) — ICSE: 94.6%

EXPERIENCE

Samsung — Bengaluru, India (Remote)

April 2026 – May 2026

Student Intern

- Engaged in training sessions to enhance technical skills, fostering professional growth and development.
- Collaborated with cross-functional teams to support project timelines and deliverables effectively.
- Participated in team meetings, sharing ideas that contributed to innovative solutions and strategies.

InAmigos Foundation (IAF) — Kolkata, India (Remote)

May 2026

Content Writer

- Wrote and edited high-quality, visually impactful content under deadline pressure with an engaging, authentic approach.
- Completed thorough research into assigned topics.
- Improved content quality by conducting thorough research and incorporating industry trends.

PROJECTS

Multi-Modal RAG System for Document Intelligence

[GitHub](#)

Technologies: Python, Vector Databases, Data Engineering

- Engineered a multi-modal Retrieval-Augmented Generation (RAG) system to process and query complex document formats (PDFs, images, text), enabling intelligent, context-aware information retrieval through an AI-driven interface.

Spam Email Detector

[GitHub](#)

Technologies: Python, TensorFlow, NLP (LSTM)

- Developed an end-to-end spam classification model using TensorFlow and NLP techniques; implemented tokenization, padding, and LSTM layers to achieve high accuracy in distinguishing between spam and legitimate emails.

CGPA Calculator

[GitHub](#)

Technologies: Python, HTML, CSS, REST APIs

- Built a full-stack web application for academic tracking featuring secure user authentication and dynamic CGPA calculations based on custom credit and grade inputs.

WeatherVista

[GitHub](#)

Technologies: Python, HTML, CSS, REST API Integration, Responsive Web Design

- Created a real-time weather tracking dashboard by integrating the OpenWeatherMap API, focusing on responsive UI design and efficient backend API routing.

Arduino-Powered Smart Catapult

Technologies: Arduino, Embedded C, Sensor Fusion

- Designed an autonomous embedded system utilizing object-sensing technology and motorized actuation to detect and engage targets, showcasing integration between hardware sensors and software logic.

Arduino-Powered Fire Extinguishing Robot

Technologies: Arduino, IR Sensors, Motor Control (L298)

- Engineered an autonomous robot for fire detection and suppression using real-time IR sensor processing and motor driver logic to navigate environments and activate extinguishing mechanisms.

PATENTS & COPYRIGHTS

MedSpeak QR: An AI-Powered Method for Simplifying Medical Reports

Filed Dec 2025

[Registered Copyright — Copyright Office, Government of India | Certificate No. LD-20260190206](#)

- Co-authored an AI-powered system that converts complex medical reports into simple, local-language audio via QR codes, enabling patients to easily understand diagnoses, medicines, benefits, and side effects.
- Credited as Author and Owner on the official Copyright Registration Certificate, granted under the Copyright Act, 1957.

CERTIFICATIONS

- Introduction to Modern AI — Cisco Networking Academy (July 2025)
- AI Fundamentals — IBM SkillsBuild (September 2025)
- Python Programming: A Practical Approach — Udemy (September 2025)
- Introduction to Large Language Models (LLMs) — NPTEL (October 2025)
- Cyber Security and Privacy — NPTEL (October 2025)
- MongoDB Basics for Students — MongoDB University (June 2025)
- AI Tools Workshop — Be10x (January 2026)
- Gen AI Engineering Mastermind — OutSkill (May 2026)

ACHIEVEMENTS

- Participated in the 24-hour NASA Space Apps Challenge Hackathon (2025)
- Participated in Google Cloud Agent AI Day Hackathon
- Best Actor Award — BOSCO Showtime, Don Bosco School, Liluah (2023)
- Third Place — State Level Kickboxing Championship, Jadavpur University (2017)
- Trained Classical Dancer — Kathak and Bharatanatyam

LANGUAGES

English, Hindi

INTERESTS

AI & Machine Learning, Software Development, Data Structures & Algorithms, Web Application Development
